41-11103	(1) 32" x 54" sheet covers 12 square feet

DynaXorb™ - to eliminate speaker back-wave distortion using sonic stealth technology. Removing the back-wave interference from the speaker produces the speakers' full potential and delivers the sound you paid for. Using DynaXorbs to cover the backwall of a subwoofer enclosure will eliminate the back-wave distortion, resulting in a clear, uncolored, accurate tight bass. This is **especially important inside Ported enclosures** because the back wave can easily escape through a port

41-11800	(2) 6" x 6" sheets - DynaXorb Speaker Kit
41-11855	(8) 6" x 6" sheets - DynaXorb Sub Pak Super Light-weight Solid Aluminum sound deadener. .014" thick. Weighs less than .2lbs per square foot.
